

Furniture Care Instructions

Thank you for choosing our handmade dining tables and chairs. Proper care will help preserve their beauty, functionality, and longevity for many years.

Wooden Surface Care.

Dusting. Regularly clean the furniture with a soft, dry, or slightly damp cloth designed for furniture care. Avoid abrasive materials and rough sponges that may scratch the surface.

Moisture Control. To prevent wood deformation or cracking, it is recommended to maintain an indoor humidity level of 40–60%. Use humidifiers or dehumidifiers when necessary.

Sunlight Protection. Protect the furniture from direct sunlight, as prolonged exposure may alter the wood color or dry out the surface. We recommend using curtains or blinds.

Heat Exposure. Do not place hot dishes directly on the table surface. Always use heat-resistant mats.

Temperature Fluctuations. Avoid sudden changes in temperature and humidity. These may cause wood deformation, surface cracks, coating damage, or weaken the furniture structure.

Liquid Spills. Wipe spilled liquids immediately with a soft, damp cloth. Do not leave moisture on the surface and avoid using excessive water.

Periodic Cleaning. When needed, use specialized wooden furniture care products, following the manufacturer's instructions. After cleaning, always dry the surface with a clean, dry cloth.

Upholstery Care (Chair Fabric)

Vacuuming. Regularly vacuum the upholstery using a soft brush attachment to remove dust and dirt.

Stain Removal. Clean spilled liquids or stains immediately with a soft, damp cloth. For more difficult stains, we recommend contacting professional cleaning specialists.

Sunlight Protection. Prolonged exposure to direct sunlight may fade the upholstery color, so we recommend keeping the furniture away from intense sunlight.

Damage Prevention. Avoid contact with sharp objects that may damage the fabric or leave scratches.

Important! Do not use abrasive cleaners, bleach, or other aggressive chemical products. Do not use excessive water when cleaning the furniture. We recommend using the furniture only indoors.

Furniture Lifting Instructions. Proper Lifting. Lift the furniture only by holding its sturdy structural parts or base. When lifting a table, it is recommended that at least two people participate. Distribute the weight evenly and lift carefully.

Prohibited! Do not lift the furniture by holding only the edges of the tabletop. Do not drag or push the furniture across the floor surface. Avoid sudden movements. **Improper lifting may damage the structure, joints, or surface.**

We hope our furniture becomes a long-lasting part of your home interior and brings you joy for many years.

**If you have any questions or are unsure about proper care, feel free to contact us.*
